

# Animal Feeding Operations in Iowa and Impaired Waters (TMDL Program)

8-digit Hydrologic Unit Codes (HUC 8s) for Iowa

10-digit Hydrologic Unit Codes (HUC 10s) for Iowa

12-digit Hydrologic Unit Codes (HUC 12s) for Iowa

The U.S. Geological Survey has developed a national hierarchical framework for identifying watersheds of different geographical scales. Each scale, or level, is designated using the hydrologic unit code (HUC) system. Iowa has 56 HUC 8 watersheds that range in size from 390 to 1,954 square miles. Within these HUC 8 watersheds are 420 smaller HUC 10 watersheds ranging from 62.5 to 390.6 square miles. Within the HUC 10s, at the local level where most watershed projects are organized, there are 1,400 HUC 12 watersheds that range from 15.6 to 62.5 square miles.
